Block-types taxonomy (AI recommend) — chuẩn bị cho 80 block type

> Soạn 2026-06-18 (góc marketing). Mỗi block gán: `function`, `page_role`, `proof_type`, `needs_media`, `funnel_stage[]`, `goal_tags[]`, `tone[]`, `industry_fit[]`, `has_cta`. Dùng để PATCH `/v1/admin/block-types/{code}` (form "TAXONOMY CHO AI GỢI Ý") → AI `recommend_blocks` khớp brief chuẩn hơn.

Enum (đồng bộ BE `oneof`)

- **function:** hook · pain · value_prop · how_it_works · benefits · social_proof · objection · offer · urgency · lead_capture · final_cta
- **page_role:** opener · body · closer
- **proof_type:** logos · testimonial · stats · review *(chỉ block social_proof; còn lại bỏ trống)*
- **needs_media:** image · video · none
- **funnel_stage:** awareness · consideration · conversion · retention
- **goal_tags:** lead_gen · sales · awareness · launch · event
- **tone:** warm · minimal · bold · corporate · playful
- **industry_fit:** agnostic (mặc định) · saas · fnb · fashion · realestate · …

JSON bulk-apply (code → taxonomy)

> Mỗi entry = body PATCH `/v1/admin/block-types/{code}`. `industry_fit: ["agnostic"]` cho hầu hết (block đa ngành); chỉnh riêng nếu cần.

```

> `legacy_embed` bỏ qua (wrapper kỹ thuật, không phải block marketing).

Ghi chú áp dụng

- Trường mảng (funnel/goal/tone/industry_fit) gửi cả mảng; `proof_type` chỉ set cho 7 block social_proof, còn lại bỏ field.
- Có thể viết script bulk PATCH lặp object trên → `/v1/admin/block-types/{code}` (admin token). Hoặc nhập tay qua form từng block.
- Đây là baseline marketing — tinh chỉnh `industry_fit` theo brand thực tế.
